DETAILED ACTION

Double Patenting

1. Claims 42-47 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 24-35 of copending Application No. 09/677,421 in view of Calderbank et al. (US 5,115,453) (hereafter Calderbank) and Divsalar et al. (US 5,023,889) (hereafter Divsalar).

Claims 24-35 of the copending application 09/677,421 disclose all claimed subject matter in claims 42-47 except the use of "Reed-Solomon encoder" and "PSK or QAM modulation". Calderbank discloses trellis coding "second data stream" and use of "PSK or QAM modulation" in Fig. 1; col. 10, line 61 to col. 11, line 5. Further, the use of "Reed-Solomon encoder" is also known in the art of coding (Divsalar, col. 3, line 2). Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the invention to incorporate the use of, i.e. QAM modulation and Reed-Solomon encoder into the aforementioned copending Application as optional to improve the data rate as well as the error correction capability of the system.

This is a <u>provisional</u> obviousness-type double patenting rejection.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 42-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farias et al. (US 4,891,806) (hereafter Farias) in view of Calderbank and Divsalar.

Farias et al discloses a transmission system comprising a first ECC (col. 10, lines 5-58), a first ECC decoder (col. 10, lines 55-58), a second ECC (Fig. 2, block 118), a second ECC decoder (Fig. 10, 195) for encoding/decoding two streams of data wherein the first data stream has information for demodulating the second data stream (Fig. 10, 206, 190). Calderbank uses "PSK or QAM modulation" in Fig. 1; col. 10, line 61 to col. 11, line 5. Further, the use of "Reed-Solomon encoder" is also known in the art of coding (Divsalar, col. 3, line 2). Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the invention to incorporate the use of, i.e. QAM modulation and Reed-Solomon encoder into Farias, as an option, to take advantage of the improving the data rate as well as the error correction capability of the system.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2634

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dac V. Ha whose telephone number is 571-272-3040. The examiner can normally be reached on 5/4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 571-272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
